Automation & Technology Construction

What Can An Automation Lawyer Do For You?

- Provide assessment and advice about legal risks in an automation project.
- Assist in drafting contracts for automation projects.
- Give counsel about protecting intellectual property rights and avoiding intellectual property problems.
- Advise clients when problems arise on an automation project.
- Assist in dispute resolution for automation projects including mediation, arbitration and litigation.

Baker & Daniels' Automation Team At A Glance:

- Lawyers with knowledge of “construction law” and “computer law.”
- Lawyers who actually understand the automation business.
- Lawyers who have assisted clients in addressing the unique legal issues that arise in automation projects throughout the United States.
- General counsel to Control System Integrators Association and its members.
